

Lyndsey Duffield

TypeScript Developer

Experience

Freelance UI Developer

October 2019 - PRESENT

I am a freelance UI and React developer. My clients include individuals and small businesses. In my most recent projects I implemented an e-commerce site for Gafly Therapeutics using TypeScript, React and Next.js as well as a full CSS redesign and a serverless article review system for ThomasHoneyman.com.

Featured Projects

Habit Tracker

<https://github.com/lyndseyduffield/habit-tracker>

I developed a fully-featured habit tracker with React. The app enables users to schedule habits, record their progress, set accountability partners to notify if they miss their goals, and more. The app is deployed on GitHub pages and features a **full test suite, continuous integration**, and a small in-browser database I implemented for the project. It currently has several active users. [You can view the deployed app here.](#)

Streams

<https://github.com/lyndseyduffield/streams>

I implemented a Twitch clone using **React, Redux, Google Auth, Axios, and Lodash**. The app lets users upload streams via [flv.js](https://flv.js.org/) and save them to a Postgres database. The user also has the ability to edit and delete streams.

Education

Completed Self-Education Courses

I have completed several online certifications and courses, including Free Code Camp's **Front End Developer Certification** and **Algorithms & Data Structures Certification**, Udemy's **Modern React and Redux**, **Web Developer Bootcamp**, and **Complete Web Developer in 2019** courses, and edX's **How to Design Programs**.
